

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## PREFACE

IN the making of this list, the books in the Children's Museum and the Girls' High School in Brooklyn, the science collection in the New York Public Library, and the books classed in 910, 790, 500 in the New York State Library were carefully examined and those suitable for this list annotated. Bibliographical aids consulted were Best Books, A. L. A. catalogue 1904, A. L. A. catalogue supplement 1904-1911, A. L. A. Booklist, Book Review Digest, Pittsburgh Carnegie Library catalogue, Publishers' Weekly, N. L. Goodrich Mountaineering, W. N. Daniell's Animals in Fiction and Folklore, E. L. Bascom Selected Books on Nature Study, New York State University Arbor Day Annuals, New York Public Library subject lists Mountaineering, Flower Gardens, Wanderers and Vagabonds, and the Bulletins of the Springfield, Detroit and Grand Rapids public libraries, and of course the United States and the Library of Congress catalogues.

Acknowledgment is also made to Miss Alice G. Higgins, Librarian, Appalachian Mountain Club, Boston, for helpful suggestions.

In each case the date is taken from the book examined. Earlier editions have been published in many cases, but are less suitable for the purpose of this list. Cheaper editions in less attractive bindings are also omitted.

Starred entries are those suited to younger students.

Certain books are now out of print or out of stock, but since they may be found in most public libraries, they are included.

Book prices are constantly changing, owing to rising costs of book-making. A price list correct today is incorrect tomorrow. This should be remembered when ordering.

"O FOR A BOOKE AND A SHADIE NOOKE!"

T is not for nothing that Book and Nook rhyme so sweetly, "either in-a-door or out" (equally in the leafy corner of a summer retreat, where a little hut suffices for a town, or in the cosy Bookshop for Boys and Girls, where ivies climb over the quaint windows set with pink geraniums, and where wait the rows upon rows of silent books, offering help, suggestion and companionship to the wise).

For Nature plus the right book is better even than lovely Nature by herself. So I believe. Few of us were *born* nature-lovers. This is one of the tastes that one learns,—but oh, so readily, with the least encouragement, since there is so much answering beauty in the hearts of us all. A book is often the Good Fairy who first touches heart-of-beauty with her awakening wand. Was it not a book that opened your eyes to the wonders of the outdoor world, and set your thoughts groping? Wasn't it a story-book that taught you to love your little brothers underbrush and treetop and still pool? Maybe a book first gave you a hint of secrets in sky, earth and sea which you had never suspected, and set you to exploring happily for yourself. Like as not a book of poems flashed upon you the revelation that you could find "tongues in trees, books in the running brooks, sermons in stones and good in everything!"

The spell of Nature is powerful; her variety infinite. No matter how satisfactory she may be in one aspect, there is always something more you can get from her, if you will. Perhaps you can reach it by yourself, if your mind is tall enough. But more likely a pile of books will help you. Books do not hamper the one who chooses well. You can make the best of time, swinging along a woodland road with your finger between the leaves of a lightsome, companionable little volume. Just to have the right book with you out of doors is one joy more! Maybe I and Thou will not today read our book of verses underneath the bough.

But it is good to see it lying there on the greensward, uninter-  
rupting, uninquisitive, with its patient offer of precious thoughts  
for us to take or leave at will. If we are the friends of books,  
we can take to Nature not only our eager eyes, our listening ears,  
our hearts full of love and the desire to learn; but we can bring  
a talisman to help us in our quest, companion us along the way  
and interpret for us the joy of the goal. What a boon is a book!  
And in the pages following, what an array of joyous titles from  
which to choose!

ABBIE FARWELL BROWN.

## POETRY

*Let me go where'er I will,  
I hear a sky-born music still:  
It sounds from all things old,  
It sounds from all things young,  
From all that's fair, from all that's foul,  
Peals out a cheerful song.*

RALPH WALDO EMERSON.

## TREES

*I think that I shall never see  
 A poem lovely as a tree:  
 A tree whose hungry mouth is pressed  
 Against the earth's sweet-flowing breast;  
 A tree that looks at God all day,  
 And lifts her leafy arms to pray;  
 A tree that may in summer wear  
 A nest of robins in her hair;  
 Upon whose bosom snow has lain,  
 And intimately loves the rain,—  
 Poems are made by fools like me,  
 But only God can make a tree.*

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There are a number of reasons why the world's population is growing so fast. One of the main reasons is that the number of children born to each woman has increased. This is because of a number of factors, including the fact that women are now having children at a younger age, and that there is a higher birth rate in developing countries. Another reason is that the number of people who are surviving into old age has increased. This is because of improvements in medical care and living conditions, which have led to a decrease in the number of people who die in childhood and old age.

The growth of the world's population has a number of implications for the future. One of the main implications is that there will be a need for more food, water, and shelter. This is because there will be more people who need these things. Another implication is that there will be a need for more jobs. This is because there will be more people who need to work. Finally, there will be a need for more education. This is because there will be more people who need to be educated.

There are a number of things that we can do to help deal with the growth of the world's population. One of the most important things is to reduce the number of children born to each woman. This can be done by providing women with better education and health care. Another thing that we can do is to improve the living conditions of people in developing countries. This can be done by providing them with better housing, water, and food. Finally, we can provide more people with education and training, so that they can find better jobs.

The growth of the world's population is a major challenge for the future. It is a challenge that we must all face. We must work together to find ways to deal with the growth of the world's population, so that we can all have a better future. We must reduce the number of children born to each woman, improve the living conditions of people in developing countries, and provide more people with education and training. Only then can we hope to have a better future for all of us.

the 1990s, the number of people in the UK who are aged 65 and over has increased by 1.5 million (1990-1999) and is projected to increase by a further 1.5 million by 2020 (Office for National Statistics 2000).

There is a growing awareness of the need to develop strategies to meet the needs of the ageing population. The Department of Health (2000) has published a strategy for ageing, which sets out the government's commitment to improve the health and quality of life of older people. The strategy is based on three main principles: (1) to ensure that older people have access to the services they need; (2) to ensure that older people are able to live independently; and (3) to ensure that older people are able to participate in society.
